Self-motivated and highly passionate Computer Applications graduate, eager to begin a career in software development. A hardworking fresher seeking an opportunity in a challenging organization where I can apply my skills and knowledge to contribute meaningfully to the growth and success of the company.

PROJECTS

Vegetable Garden Management System – Frappe Framework

- Developed a web-based application using the Frappe Framework enabling admins to update daily vegetable availability and customers to place online orders seamlessly.
- Implemented core modules including inventory management, order placement, and employee task assignment with real-time status tracking.
- Streamlined admin-customer interaction by integrating user-friendly interfaces and automated task workflows for efficient order processing and management.

Restaurant Bill Payment System

- Developed a Restaurant Bill Payment System as a web application using HTML, CSS, PHP, and JavaScript for dynamic and responsive user interaction.
- Implemented features for order placement, billing automation, and admin order management, ensuring accurate and real-time updates.
- Integrated a MySQL database to manage menu items, track orders, store billing records, and support sales analysis for decision-making.

E-Commerce Platform -Laravel & Bootstrap

- Built a complete online shopping system with user and admin roles, featuring product browsing, shopping cart, wishlist, checkout process, and automatic inventory management
- Developed admin dashboard for managing products, categories, and orders with real-time status updates and Google OAuth login integration

SKILLS

- Programming Languages: Python,Java,C,C++,R Programming,DotNet
